

# Casper

brought to you by  mattressonline

We believe in the power of a great night's sleep, so we create award-winning, expertly designed products for your best rest. Now let's get ready for bed.

# Setting up your mattress

It's as easy as 1, 2, zzz..

Unpack your mattress in the room where you plan to sleep on it. Lay it on its side.

Find the end of the outer packaging and pull it towards you.

Once you've unrolled your mattress on your bed, remove any outer packaging. Hop on! Your mattress awaits.

# Frequently asked questions

We've got answers to some of the most common questions about owning and caring for your Casper mattress.

## **Will it take time to adjust to my mattress?**

Depending on the type of mattress you had before, it might take some time for your body to adjust. Give yourself at least 30 days to adapt.

## **Do I need to flip it?**

No! Casper mattresses are arranged in specific layers and should never be flipped. We do recommend rotating it 180° every six months.

## **How do I clean it?**

To clean stains, unzip the cover and spot clean with mild detergent and warm water, or machine wash on a gentle cycle. To avoid shrinking, do not put the cover in the dryer.

# What can I put it on?

Casper mattresses are designed to rest on practically any firm, flat surface.

## Flat Platform

A flat platform or adjustable base offers plenty of direct support under your mattress.

## Slatted Base

A slatted base works just fine. The slats should be solid, wooden, secured into the base, and spaced less than 10cm apart.

## Divan Base

A divan base will offer plenty of support under your mattress, with the bonus of storage options.
